All-in-one essential protection

An award-winning antivirus

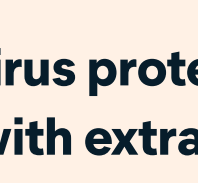

A VPN for online privacy

PC clean up and speed tools

Avast One — everything you need to protect and optimize your Windows 10 PC

Get antivirus protection that comes with extra features

It not only secures your Windows 10 PC, but your entire home network as well — and comes with advanced features like ransomware and password protection.

Enjoy online privacy with a VPN

Hide your IP address and your online activities, browse privately and anonymously, and access your favorite online content from wherever you are in the world.

Speed up your Windows 10 PC

Easily remove hidden junk and old files from your PC, speed up its performance, and free up disk space with our clean up tools.

You can rely on Avast to protect you

Here's why Avast is one of the most trusted, reliable, and experienced cybersecurity experts in the world.

World-class protection

We're proud to protect our users but we're also proud of the many top awards our antivirus has earned.

435+ million users

Our vast global user base means we have the largest threat detection network in the industry — so we catch new threats fast.

30+ years of experience

When it comes to creating an antivirus that protects you from all angles — we know exactly what it takes.

Easy to install, effortless to use

Avast One gives you our award-winning antivirus software, plus some of our best privacy and clean-up tools, all in one handy download.

Free download

It's free forever

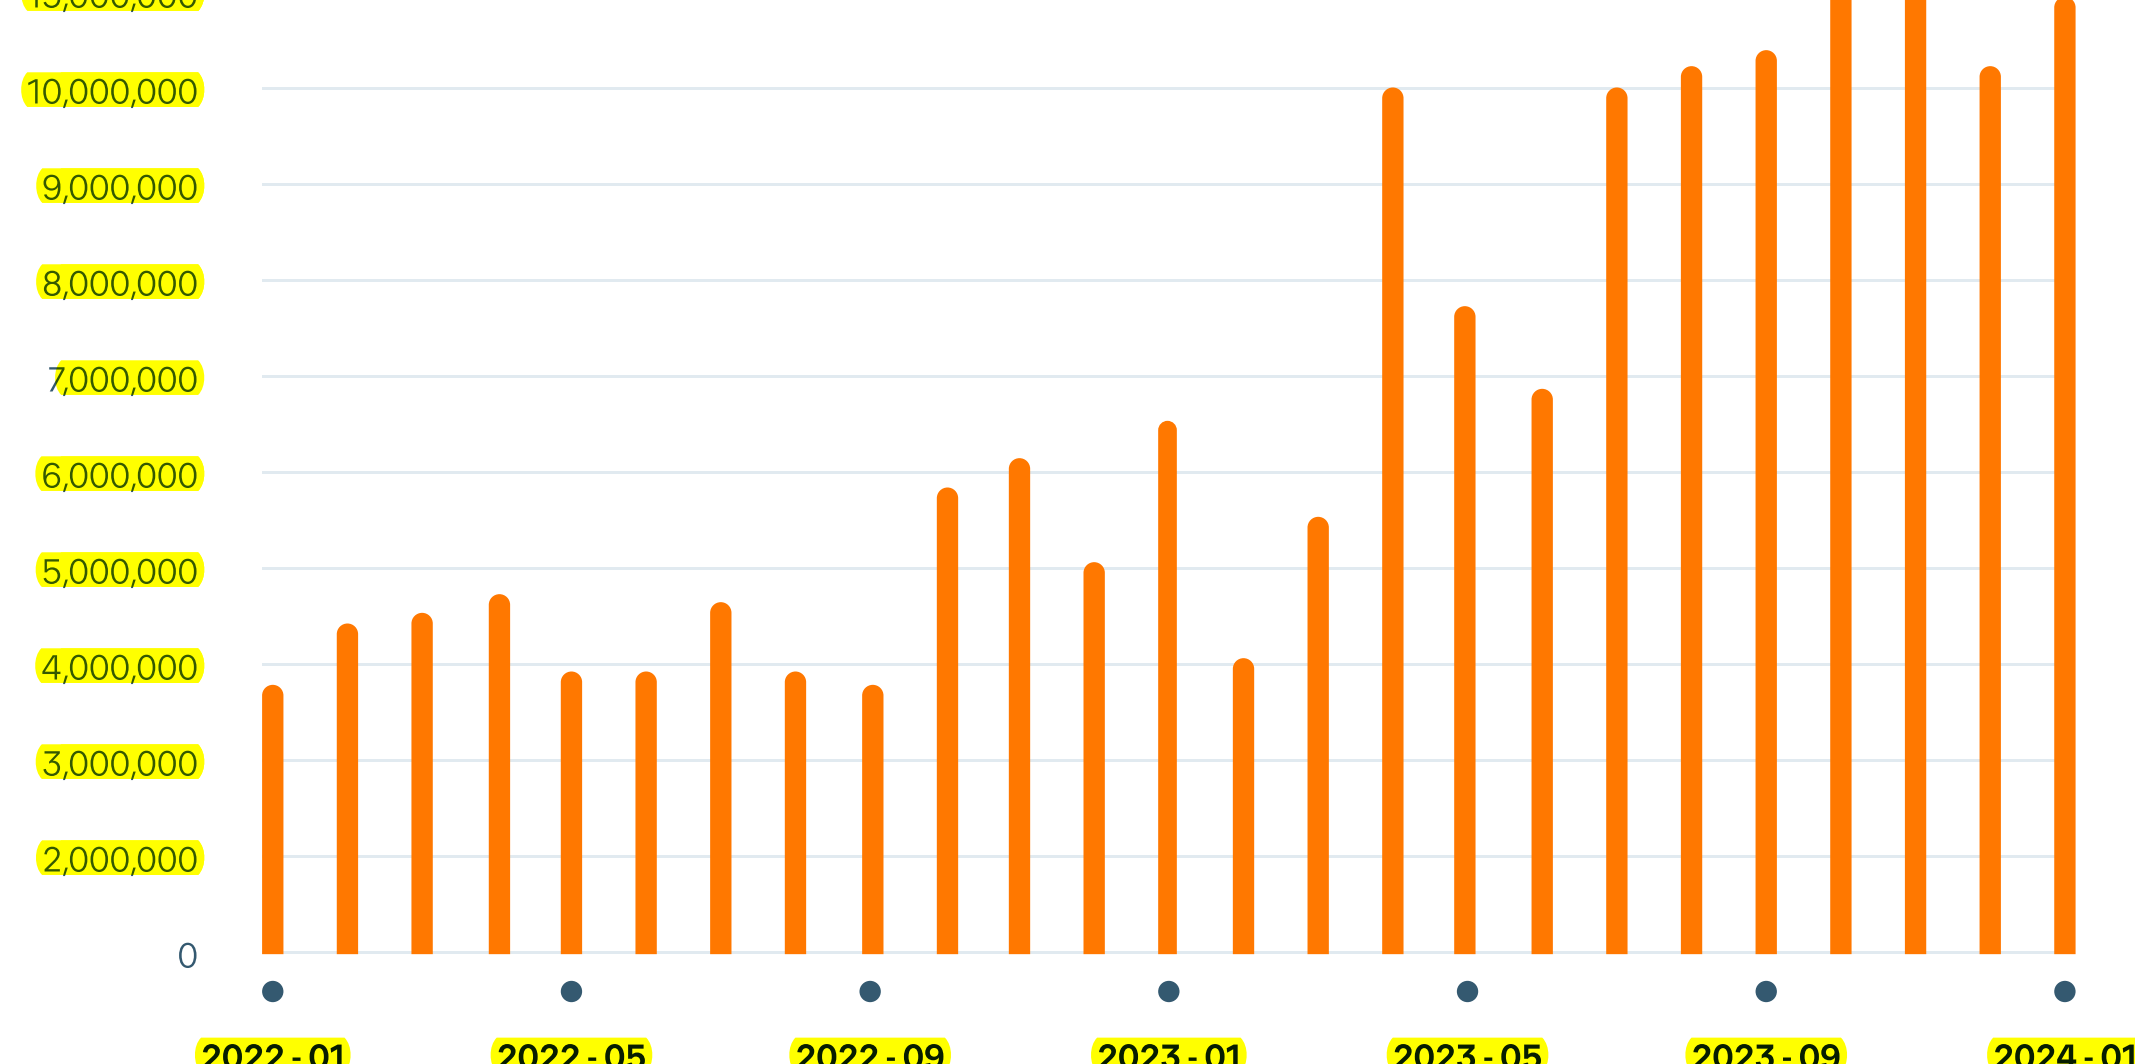

Get advanced Windows 10 antivirus protection against online threats like viruses and other malware, for free. But we don't stop there. We offer extra security features such as behavior shield, remote assistance, browser cleaning and more — yep, you guessed it — completely free.

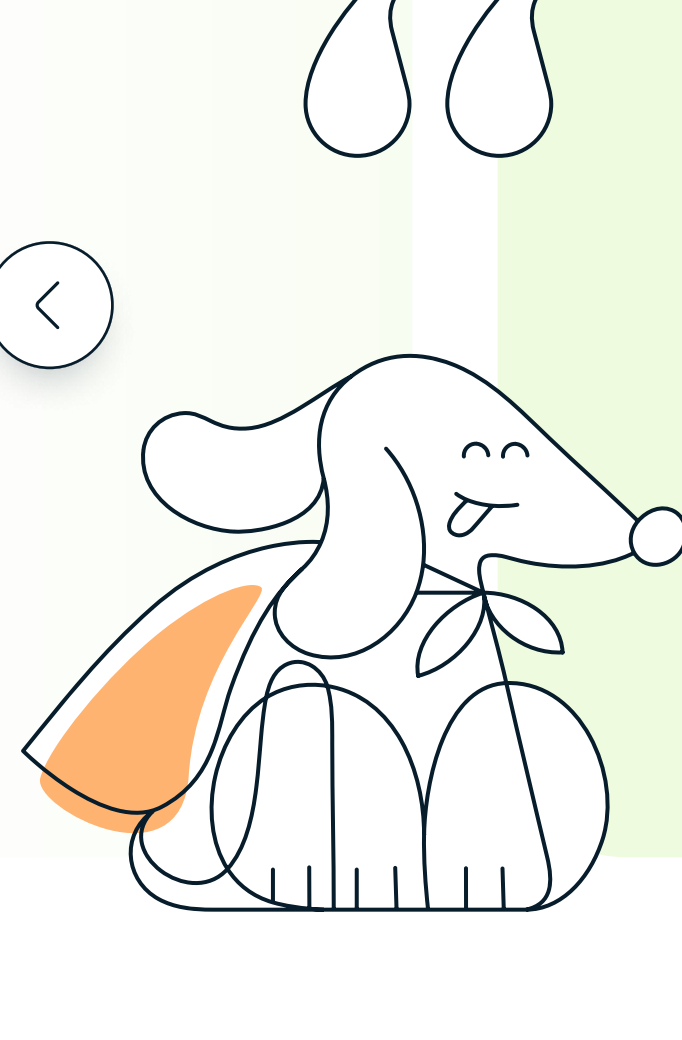

Around-the-world, around-the-clock protection

We're proud to protect millions of Windows PCs. But don't just take our word for it — see the graph below which shows that Avast One has prevented 194 031 911 virus attacks on Windows 10 PCs over recent months.

Number of attacks prevented against Windows 10 PCs over recent months:

Over 400 million users trust us with their digital lives

I've been using Avast for years and have recommended it to many people. It's reliable, fast and doesn't slow the computer.
